

"Coccinella" is the first household steam machine with a professional performance that is capable of producing continuous dry steam for deep ecological and radical cleaning. "Coccinella" is equipped with a separate tank for water reloading which is not under pressure, guaranteeing autonomy, as it automatically feeds the boiler.

The advanced technology of this machine, together with the precise production technique, make "Cochinella" the most reliable steam cleaning product on the market, as well as being considered the safest and most economical machine of all.

High technology at ecology's service. Over four years of research have guaranteed the future of this revolutionary, intelligent, household appliance!

"Coccinella" is an amazing and innovative idea. The antisplash GS-TUV homologation conforms with the EC standards regarding radio interference suppression. It's boiler is tested according to the new TRD 801/08.96 Norm, making the "Coccinella" a safe product, with no problems.

Standard Tool Kit

Domestic Uses

Clean your ovens, grouting, tiles, hard floors, upholstery, carpets, curtains, baths, sinks, toilets, fridges, defrost freezers, iron clothes & much more!

Commercial Uses
