

# CUBO<sub>3</sub> Delux

Fresh thinking in sanitization

A light weight portable generator with inbuilt ozone destruction cycle to remove ozone after use. CUBO<sub>3</sub> Delux can be controlled remotely with a wireless connection from smartphone or tablet.

This unit is easily portable, and so is suitable for sanitization of smaller rooms and multiple rooms applications.

Ozone production capacities of up to 8gr/hr are available, with 8 programmes of use from 15 minutes to 24 hrs.

## Applications

- Nurseries
- Schools
- Cinemas and theaters
- Offices
- Conference rooms
- Transportation
- Smoking rooms
- Hospitals
- Rest homes
- Dental sector
- Veterinary
- Canteens
- Restaurants and bars
- Wineries
- Shopping centers
- Gyms
- Public toilets
- Hotels
- Business centers
- Cruise liners and yachts
- Cold storage areas
- Food laboratories
- Refrigerated trucks

## Benefits

- Uses no chemicals
- Leaves no residues
- Highly effective surface sanitiser
- 7.3kg easily mobile lightweight unit
- Security sensor extends destruct cycle until health and safety levels are achieved
- Wifi controlled remote access

## Features

- Audible alarm
- 8 pre-programmed cycles from 15 minutes to 24 hours
- Ozone destruct cycle integrated to all programmes
- 8g/hr ozone output
- Air Flow: 450m<sup>3</sup>/hr
- Weight 7.3kg
- Dimensions: 280mm x 280mm x 280mm

# CUBO<sub>3</sub> Delux

Fresh thinking in sanitization

CUBO<sub>3</sub> Delux is able to sanitize an environment in a safe, quick and effective way without the use of chemicals.

Ozone restores the quality of air in an environment through the destruction of the cells of biological agents such as viruses, enzymes, bacteria, fungi, etc.

Ozone destroys odours such as those caused by smoking, damp, cooking and paint, naturally attacking the odour to eliminate it.

As a gas ozone can penetrate hard to reach areas, and is especially effective at reaching odours trapped in soft furnishings.

Fungi

Petri dish proving the benefit of using CUBO<sub>3</sub> Delux before and after treatment

Each cycle is programmed to work in 2 phases:

- Ozone emission
- Ozone destruction

An easy to use selector on the top of unit allows you to choose the best programme for each application. This is fitted with a security sensor via wi-fi and controlled with smartphone or ipad.
